Plastics pipes and fittings — Utilisation of thermoplastics recyclates

Part 1: Vocabulary

National foreword

This British Standard is the UK implementation of EN 14541-1:2022. Together with PD CEN/TS 14541-2:2022, it supersedes PD CEN/TS 14541:2013, which will be withdrawn on publication of PD CEN/TS 14541-2:2022.

The UK participation in its preparation was entrusted to Technical Committee PRI/88/1, Plastics piping for non-pressure applications.

A list of organizations represented on this committee can be obtained on request to its committee manager.

Contractual and legal considerations

This publication has been prepared in good faith, however no representation, warranty, assurance or undertaking (express or implied) is or will be made, and no responsibility or liability is or will be accepted by BSI in relation to the adequacy, accuracy, completeness or reasonableness of this publication. All and any such responsibility and liability is expressly disclaimed to the full extent permitted by the law.

This publication is provided as is, and is to be used at the recipient's own risk.

The recipient is advised to consider seeking professional guidance with respect to its use of this publication.

This publication is not intended to constitute a contract. Users are responsible for its correct application.

This European Standard was approved by CEN on 7 February 2022.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

European foreword

This document (EN 14541-1:2022) has been prepared by Technical Committee CEN/TC 155 “Plastics piping systems and ducting systems”, the secretariat of which is held by NEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by November 2022, and conflicting national standards shall be withdrawn at the latest by November 2022.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document, together with Part 2 of the EN 14541 series, supersedes CEN/TS 14541:2013.

This document is part of the new EN 14541 series, which will consist of the following parts under the general title *Plastics pipes and fittings - Utilisation of thermoplastics recyclates*:

- a) *Part 1: Vocabulary* (this document);
- b) *Part 2: Recommendations for relevant characteristics*.

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organisations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Introduction

The EN 14541 series is intended to give recommendations to the value chain of thermoplastics piping systems to stimulate the use of thermoplastics recyclates (e.g. PVC-U, PVC-C, PE, PP, and ABS) as defined in the European circular economy policy.

This part of the EN 14541 series defines the relevant terms and definitions related to the use of thermoplastics recyclates in thermoplastics pipes and fittings. The commonly used terms and definitions are reviewed, and as much as possible aligned with the practices within the thermoplastics pipes and fittings value chain and the vocabulary used in European policy documents (e.g. circular economy, sustainability) and existing international standards.

Part 2 is a CEN/TS document in which recommendations are given about the relevant characteristics for defining (e.g. fingerprinting) commonly used thermoplastics recyclates intended to be used in thermoplastics pipes and fittings.

NOTE These characteristics are intended for use within an agreed specification.

CEN/TC 249 “Plastics” developed a series of CEN publications on “Plastics Recycling” which consists of:

EN 15343 [1], EN 15344 [2], EN 15345 [3], EN 15346 [4], CEN/TS 16010 [5] and CEN/TS 16011 [6].

Other documents that discuss recycling are e.g. ISO 15270 [7] and Waste Framework Directive [8].

1 Scope

This document specifies the general terms and definitions relevant for the utilization of thermoplastics recyclates in thermoplastics pipes, fittings and ancillaries for both pressure and non-pressure piping systems.

This document is intended to be used by specification writers in conjunction with CEN/TS 14541-2 when preparing normative documents under the scope of CEN/TC 155.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN ISO 472:2013¹⁾, *Plastics - Vocabulary (ISO 472:2013)*

CEN/TS 14541-2, *Plastics pipes and fittings - Utilisation of thermoplastics recyclates - Part 2: Recommendations for relevant characteristics*

CEN/TR 15353, *Plastics - Recycled plastics - Guidelines for the development of standards for recycled plastics*

EN ISO 1043-1, *Plastics - Symbols and abbreviated terms - Part 1: Basic polymers and their special characteristics (ISO 1043-1)*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in EN ISO 472:2013¹⁾ and CEN/TR 15353, the abbreviated terms related to recyclates given in EN ISO 1043-1 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- ISO Online browsing platform: available at <https://www.iso.org/obp>
- IEC Electropedia: available at <https://www.electropedia.org/>

3.1

virgin material

plastics material in the form of pellets, granules, powder, floc, etc. that has not been subjected to use or processing other than that required for its initial manufacture

Note 1 to entry: Does not contain any reworked plastics material and/or plastics recycle.

Note 2 to entry: Sometimes also referred to as “primary material” or “primary plastics feedstock”.

Note 3 to entry: It is understood that the addition of additives such as stabilizers and pigments is still resulting into a virgin (plastics) material.

[SOURCE: ISO 472:2013, 2.1231, modified – Note 1 to entry, Note 2 to entry and Note 3 to entry added]

3.2

reworked material

plastics material from rejected unused products or trimmings capable of being reclaimed within the same process that generated it

Note 1 to entry: Reworked material does not change the status of the feedstock.

1) As impacted by EN ISO 472:2013/A1:2018.

Note 2 to entry: This definition does not cover the conditions for the use of reworked material, which can be found in the applicable product standard.

Note 3 to entry: Previously referred to as “own reprocessed material”.

3.3 **pre-consumer material**

plastics material diverted from the waste stream during a manufacturing process, excluding reworked (plastics) material

Note 1 to entry: Previously referred to as “post-industrial material”.

Note 2 to entry: Different categories of pre-consumer material may be considered in the applicable product standard.

[SOURCE: ISO 14021:2016, 7.8.1.1 modified – “plastics” added, text deleted after “rework” and 2 Notes to entry introduced]

3.4 **post-consumer material**

plastics material generated by households or by commercial, industrial and institutional facilities in their role as end-users of the product which can no longer be used for its intended purpose

Note 1 to entry: This includes returns of material from the distribution chain.

Note 2 to entry: Different categories of post-consumer material may be considered in the applicable product standard.

[SOURCE: ISO 14021:2016, 7.8.1.1 modified – “plastics” added, last sentence changed into Note 1 to entry and Note 2 to entry introduced]

3.5 **recyclate**

plastics material resulting from the recycling of pre-consumer and post-consumer plastics products

Note 1 to entry: Also referred to as “secondary raw material” or “recycled plastics” or “regenerate”.

Note 2 to entry: Recycling can be chemical, physical or mechanical.

[SOURCE: ISO 472:2013, 2.1705, modified – Note 1 to entry and Note 2 to entry deleted, new Note 1 to entry and Note 2 to entry introduced and “plastic waste” changed into “pre-consumer and post-consumer plastics products”]

3.6 **recycled content**

proportion, by mass, of recyclate in a product

[SOURCE: ISO 14021:2016, 7.8.1.1 modified – second sentence deleted]

3.7 **recycling**

processing of plastics products into recyclate, for the original purpose or for other purposes, excluding energy recovery

[SOURCE: ISO 472:2013, 2.1706, modified – “Waste materials” changed into “Plastics products”]

3.8 **mechanical recycling**

processing of plastics products into recyclate without significantly changing the chemical structure of the material

[SOURCE: ISO 472:2013, 2.1697, modified – “waste into secondary raw material or products” changed into “products into recyclate”]

3.9

chemical recycling

conversion to monomer or production of new raw materials changing the chemical structure of plastics products/materials by cracking, gasification or depolymerization, excluding energy recovery and incineration

[SOURCE: ISO 472:2013, 2.1690, modified – Note 1 to entry deleted]

3.10

micronized material

plastics material finely ground into powder

[SOURCE: CEN/TR 15353]

3.11

compound/formulation

clearly defined homogeneous mixture of substances used for the manufacture of the product

Note 1 to entry: In general, the term “compound” is used for polyolefins and the term “formulation” for PVC.

Note 2 to entry: For metals and when dealing with water and food contact regulations the term “composition” is often used instead of compound/formulation.

3.12

granulate

relatively small particle produced in various sizes and shapes in operations such as cutting, grinding and granulation

NOTE Often also referred to as “pellet” or “granules”.

[SOURCE: ISO 472:2013, 2.450, modified – “crushing, precipitation and polymerization” deleted, Note 1 to entry deleted and new Note 1 to entry introduced]

3.13

batch

definite quantity of some commodity manufactured or produced under conditions that are presumed uniform

NOTE Batch can apply to material and products.

[SOURCE: ISO 472:2013, 2.560, modified – definition name changed from “lot” to “batch”]

3.14

contaminant

unwanted substance or material

[SOURCE: ISO 472:2013, 2.1684, modified – Note 1 to entry deleted]

3.15

agreed specification

specification of the relevant material characteristics agreed between the supplier of the recylate and the pipe and/or fitting manufacturer Note 1 to entry: The agreed specification is often considered in the context of certification by a third party organization.

4 Abbreviations

PE: polyethylene

PP: polypropylene

PVC-C: chlorinated poly(vinyl chloride)

PVC-U: unplasticized poly(vinyl chloride)

ABS: acrylonitrile butadiene styrene

British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

Copyright in BSI publications

All the content in BSI publications, including British Standards, is the property of and copyrighted by BSI or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use.

Save for the provisions below, you may not transfer, share or disseminate any portion of the standard to any other person. You may not adapt, distribute, commercially exploit or publicly display the standard or any portion thereof in any manner whatsoever without BSI's prior written consent.

Storing and using standards

Standards purchased in soft copy format:

- A British Standard purchased in soft copy format is licensed to a sole named user for personal or internal company use only.
- The standard may be stored on more than one device provided that it is accessible by the sole named user only and that only one copy is accessed at any one time.
- A single paper copy may be printed for personal or internal company use only.

Standards purchased in hard copy format:

- A British Standard purchased in hard copy format is for personal or internal company use only.
- It may not be further reproduced – in any format – to create an additional copy. This includes scanning of the document.

If you need more than one copy of the document, or if you wish to share the document on an internal network, you can save money by choosing a subscription product (see 'Subscriptions').

Reproducing extracts

For permission to reproduce content from BSI publications contact the BSI Copyright and Licensing team.

Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

PLUS is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email cservices@bsigroup.com.

Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.
